## Cleaning a Cannabis Greenhouse

Cleaning a cannabis greenhouse starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation.

Note: Plants and greenery must be removed before any chemical application.

1

### Disinfectant: UniTab

UniTab's gentle formula is non-corrosive and doesn't generate fumes which could be harmful for plants. It's effective against a broad range of microorganisms and is a safer alternative to bleach. DIN: 02470381.

- Dilute 2 tablets per 1 L of water for disinfection.
- Dilute 1 tablet per 20 L of water for sanitizing.

2

### Victory Electrostatic Sprayer/Backpack

Greenhouses have many crevices and unreachable surfaces. The Victory Series makes those hard to reach areas attainable by providing a 360° coverage on all targeted surfaces. Ideal for use with disinfectants, degreasers, and odour control.

- Available with a 0.25 gallon tank capacity (Sprayer)
- Available with a 2.25 gallon tank capacity (Backpack)
