

The Dustbane Way

Cleaning a Greenhouse

Cleaning a greenhouse starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation.

1

Disinfectant: UniTab

UniTab's gentle formula is non-corrosive and doesn't generate fumes which could be harmful for plants. It's effective against a broad range of microorganisms and is a safer alternative to bleach. DIN: 02470381.

- Dilute 2 tablets per 1 L of water for disinfection.
- Dilute 1 tablet per 20 L of water for sanitizing.

2

Hard Surface Cleaner: Oxy-Q

A hydrogen peroxide based disinfectant can prevent the growth of algae and viral plant pathogens in a greenhouse. Oxy-Q has limitless cleaning options and is perfect for removing residues and dirt off of hard surfaces. UL ECOLOGO® Certified.

- Dilute in cold water at a rate of 1:256.
- Available in 4 L.

3

Floor Cleaner: Emerald

Dirt, mud and debris are no match for Emerald. Use to cut through heavily soiled floors with safe but powerful ingredients. Emerald is suitable for all washable surfaces and contains no solvents or phosphates. UL ECOLOGO® Certified.

- Dilute in cold water at a rate of 1:80.
- Available in 4 L.

4

Victory Electrostatic Sprayer: Handheld/Backpack

Greenhouses have many crevices and unreachable surfaces. The Victory Series makes those hard to reach areas attainable by providing a 360° coverage on all targeted surfaces. Ideal for use with disinfectants, degreasers, and odour control.

- Available with a 0.25 gallon tank capacity (Handheld)
- Available with a 2.25 gallon tank capacity (Backpack)

5

Debris Pickup: Targa 990

Greenhouse floors can get dirty quickly. A high performance wet & dry canister vacuum is the perfect piece of equipment for picking up anything that can track in and out of the area. The attached squeegee on the Targa 990 is ideal for water residue and mud.

Note: Plants and greenery must be removed before any chemical application.
