

# The Dustbane Way

## Cleaning a Manufacturing Facility

Cleaning a manufacturing facility starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation.

### Sweeping Compound

Dustbane Sweeping Compound is used to clean and reduce airborne dust during sweeping and to ease the removal of dust and dirt on sealed and unsealed wood, concrete and metal floors. 100% biodegradable.

1

### Multi-Purpose Cleaner & Degreaser: Emerald

Because the machines used in manufacturing facilities often cause grease to build up on the floors and equipment, the choice of a good degreaser is very important. Emerald effectively cuts through grease, oil and heavily soiled surfaces, while having a reduced environmental impact. The use of Emerald as a hard surface cleaner will also reduce your chemical inventory while providing you with the cleaning results you strive for. UL ECOLOGO® Certified.

- Dilute in cold water at a rate of 1:80 (cleaner)
- Dilute in cold water at a rate of 1:40 (degreaser)
- Available in 750 ml (RTU), 4 L & 20 L.

3

### Floor Sealer: Foundation

Foundation stops concrete dusting, improves stain resistance, increases abrasion and crush resistance, and makes the surface less susceptible to damage from heavy traffic. Foundation achieves uncommon levels of durability and permanency for total sealer protection APE and odour free. UL ECOLOGO® Certified.

- Two to three coats recommended.
- Available in 4 L & 20 L.

2

### Hand Cleaner: Ultra Orange

While on a production line, workers can get their hands dirty with a range of oils, grease and dirt. Ultra Orange is an industrial strength hand cleaner that can tackle any job, offering deep cleaning power while being gentle on the hands.

- Ready-to-use.
- Available in 4 L.

4

### Debris Pickup

Cleaning debris that have accumulated on floors with a broom takes a long time and just stirs the dust up into the air. To get the job done quickly and efficiently, this process requires a good performing, high capacity wet & dry canister vacuum such as the PC-3, PC-3 on drum or XL 18 Tip & Pour.
