

# The Dustbane Way

## Cleaning a Pool Area

Cleaning a pool area starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation.

1

### Pool Deck Cleaner: Emerald

Pool decks should be cleaned regularly to prevent the spread of disease as well as the slipperiness that results from biofilm growth. Dirt, grease and scum can be removed by scrubbing the decks with Emerald. Its non-abrasive formula is no risk for tile and grout.

- Dilute in cold water at a rate of 1:80.
- Available in 750 ml (RTU), 4 L & 20 L.

2

### Pool Wall Cleaner: Resolve

During shut down, Resolve will save you time and a lot of headaches when it comes to removing stubborn calcium, lime and hard water stains that can form over time along the water line of the pool wall. It works effectively with minimum elbow grease.

- Dilute in cold water at a rate of 1:5.
- Available in 5 L, 20 L, 210 L.

3

### Rust & Corrosion Cleaner: Quick Fix

Rust and corrosion can form around the fixtures and steps of the water slide. Quick Fix easily removes rust and corrosion from multiple surfaces.

- Use concentrated.
- Available in 1 L.

4

### Tile & Grout Cleaning: Integra-D

Used in combination with the Fast Track Kit, our new floor preparation machine is designed to pick up 80% of grinding residue at the source and on the first pass. Orbital machine for practically dustless and chemical free scrubbing and stripping, with less clean up, to increase your productivity.

- 20" or 28" scrubbing path.

5

### Floor Drying: Targa XL 18 Dolly

This wet/dry pickup canister vacuum will dry your floors quickly. Compatible with front mount squeegee.

- Rugged, non-corrosive construction and chemical resistant.
- Dolly included for ease of transportation and dumping.

6

### Floor Cleaning: Hurricane Mini

Our most compact auto-scrubber will wash your floors in difficult to reach areas while enhancing productivity in small spaces.

- Height-adjustable handle.
- 14" scrubbing path.
