## Cleaning a Train: The Interior

Cleaning a train begins with a simple program. Ask us about a custom program that will meet your individual needs. Here is our baseline recommendation.

1

### Disinfectant Cleaner: Quat Plus

Infectious diseases can be carried aboard the train. Using a disinfectant with a detergent can perform two tasks at once and prevent the spread of germs and diseases. Quat Plus also eliminates odours without the harsh smell of chemicals. UL ECOLOGO® Certified.

- Dilute in cold water at a rate of 1:80.
- Available in 4 L.

3

### Odour Control: Bio-Bac II

Train odours can have an impact on customer experience. Continued use of Bio-Bac II provides a safe and efficient way to maintain clean, sanitary and odour free surfaces. The “people friendly” bacteria keeps working long after Bio-Bac II’s initial application. UL ECOLOGO® Certified.

- Dilute in cold water at a rate of 1:20.
- Available in 4 L.

2

### Glass and Chrome Cleaner: Azure

Make sure commuters are satisfied with the condition of the train and let them enjoy the view by keeping your windows, mirrors, chrome and stainless steel sparkling clean and streak free. APE, VOC and ammonia free. UL ECOLOGO® Certified.

- Dilute in cold water at a rate of 1:16.
- Available in 750 ml (RTU) & 4 L.

4

### Victory Electrostatic Sprayers

With a large volume of travellers, trains can become heavily contaminated with other germs and illnesses. The Victory Electrostatic sprayers use static electricity to charge up the dispensed chemical in the tank, so the product will stick to the desired surface and wrap them entirely in chemicals for thorough disinfection.
