

The Dustbane Way

Cleaning a Waiting Area

Cleaning a waiting area starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation.

1

Disinfectant Cleaner: Quat Plus

Quat Plus kills germs on surfaces, door handles, and objects, and offers the cleaning performance of a neutral quat that eliminates foul odours by destroying a wide range of bacteria, fungi and viruses without the harsh smell of chemicals. UL ECOLOGO Certified.

- Dilute in cold water at a rate of 1:80.
- Available in 4 L.

2

Multi-Purpose Cleaner: Excelsior

The use of Excelsior as a general purpose hard surface cleaner will minimize your chemical inventory while providing the cleaning results you strive for. UL ECOLOGO Certified.

- Dilute in cold water at a rate of 1:64.
- Available in 4 L & 20 L.

3

Glass and Chrome Cleaner: Azure

Make a good impression by keeping your mirrors, glass, chrome and stainless steel sparkling clean and streak free. APE, VOC and ammonia free. UL ECOLOGO Certified.

- Dilute in cold water at a rate of 1:16.
- Available in 750 ml (RTU) & 4 L.

4

Spot Remover: Eco-Expert

While customers wait, spills, coffee, crumbs, dirt and other debris end up on chairs and in places you'd least expect. Keeping your chairs clean is a chore you must perform to keep stains off your customers' clothing. You don't need a harsh chemical to remove stains and spots; a small amount of Eco-Expert will suffice.

- Dilute in cold water at a rate of 1:125.
- Available in 4 L.

5

Odour Control: Air Max and Air Flex

An effective passive air system will neutralize airborne odours and mechanical smells caused by car repairs throughout the room. The Air Max and Air Flex are designed to offer consistent and powerful odour control for a full 30 days and are far more effective than gels, wicks and aerosols.

- Available in mango, cotton blossom and cucumber melon.
