

The Dustbane Way

Cleaning a Warehouse

Cleaning a warehouse starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation.

Sweeping Compound

Dustbane Sweeping Compound is used to clean and reduce airborne dust during sweeping and to ease the removal of dust and dirt on sealed and unsealed wood, concrete and metal floors. 100% biodegradable.

1

Cleaner & Degreaser: Complex Orange

Because the machines used in warehouses often cause grease to build up on the floors and equipment, the choice of a good degreaser is very important. Complex Orange is a solvent free cleaner degreaser that quickly emulsifies and removes the toughest dirt and soils.

- Dilute in cold water at a rate of 1:30.
- Available in 4 L, 20 L & 210 L.

2

Floor Sealer: Foundation

Foundation stops concrete dusting, improves stain resistance, increases abrasion and crush resistance, and makes the surface less susceptible to damage from heavy traffic. Foundation achieves uncommon levels of durability and permanency for total sealer protection. APE and odour free. UL ECOLOGO® Certified.

- Two to three coats recommended.
- Available in 4 L & 20 L.

3

Debris Pickup

Cleaning debris that have accumulated on floors with a broom takes a long time and just stirs the dust up into the air. To get the job done quickly and efficiently, this process requires a good performing, high capacity wet & dry canister vacuum such as the PC-3, PC-3 on drum or XL 18 Tip & Pour with front mount squeegee.

4

Floor Sweeping: Gladiator 1404

An industrial ride-on sweeper machine will allow you to perform warehouse sweeping in a more effective and efficient way.

- Run time of 4.5 hours.
- Automatic adjusting of brush pressure.
- 58" sweeping path.
