

YOUR RETURN TO WORK ESSENTIALS

WHY ALCOHOL MAY BE DESTROYING YOUR INVESTMENT

Just like they say oil and water don't mix, neither does alcohol and plexiglass.

Plexiglass is a staple in a lot of facilities, and needs to be cleaned all the time to maintain its' appearance. Over time, cleaners containing alcohol can ruin plexiglass with fogging and cracking. A crack in plexiglass means any protection from person to person is tampered with.

Alcohol-Based Cleaner

Azure RTU

Doodle Buster (50247)

When it's time to remove or refresh social-distancing markers, try Doodle Buster for removing sticky adhesive from floors.

www.dustbane.ca

Azure RTU contains no alcohol, ammonia, or harsh chemistry that can damage plexiglass.

Keep your customer's reopening investment in top shape without the risks of fogging and cracking.

Azure (50202)

- New and improved formula with a superior performance curve
- No rinsing required

HAVE YOUR CUSTOMERS GONE TOUCHLESS?

A recent study has shown that restroom attendees were more likely to wash their hands if they could use soap from a touchless soap dispenser as opposed to a manual dispenser.

Now it's more important than ever to switch to contactless methods in every day tasks.

Touchless Soap Dispenser

51680 (Foaming), 51681 (Lotion),
51682 (Spray)

- Sleek look compliments any decor
- Eliminates cross-contamination

WHY BUY IN BULK?

Refillable soap cartridges not only need to be ordered more and causes a lot of plastic pollution, but a lot of the soap leftover goes to waste!

A jug of **Tradition Plus** (50228) is good for up to 12,000 handwashes. Show your customers the endless benefits of an ECOLOGO® Certified foaming hand soap that will quickly deliver unbeatable cost-in-use.

Check out our lineup of ready-to-use disinfectants with evidence against COVID-19.
