

STOP DUST IN IT'S TRACKS:
TRACKER

The new upright vacuum by
Dustbane Products Ltd.

Code: 71000

Designed to last

The Tracker is built to give you years of worry-free use. This heavy duty commercial machine is designed for durability and daily use. It features a metal handle, metal bottom plate, and metal brushroll. The Tracker's remarkable cleaning performance and sleek design will make you almost forget you are using a commercial vacuum.

Motor-By-Pass system, all dirt is directly deposited to the bag, bypassing the motor and ensuring protection of the fan blades.

Corners and hard to reach areas are taken care of quickly and easily with convenient readily available on-board cleaning tools.

The tools included are:

- Aluminum telescopic Power Wand of 1 ft. cleaning reach
- 7 ft. stretch hose
- Dusting brush with natural bristle
- Crevice tool

Metal handle with foam grip will ensure comfort for your hands.

50 foot power cord allows for extensive cleaning in larger areas without changing the location of the power source.

Comes equipped with a thermal overload on the motor, designed to protect the motor and prevent burn out from overload.

New! Latest updates in the Tracker 2.0:

- New sleek design
- Longer crevice tool
- Bigger dusting brush
- Clear bumper guard
- Dark wand color
- Full bag indicator

HEPA stands for High-Efficiency Particulate Air. HEPA media filters are most commonly known for their use in vacuum cleaners. The HEPA media filter is designed to remove small particulate or floating matter from the air and trap it inside the cleaning appliance.

HEPA filters are made of interwoven pieces of fiberglass put together at random to create a web-style filter. The idea is to have a tightly-woven filter at the end of the filtration process, which will help stop most air particulates and pollutants.

HEPA filtration system prevents lung damaging airborne particles to be recirculated back into the air by capturing them in the filter.

Metal brushroll.

Metal bottom plate.

Rubber furniture guard will keep your walls and furniture protected.

Upright Vacuum

Reliable Cleaning

Reliable floor to ceiling cleaning. The Tracker is designed to withstand the demands of professional cleaning and offers years of worry-free use. Sleek with a remarkable design, it offers all-metal high-wear components – handle tube, bottom plate, and brush roll – to support years of use.

Breathe Easy

Features Clean Air Technology allowing only filtered air to pass through the fan and motor system and back into the room. Each vacuum is equipped with HEPA Media vacuum bag for advanced filtration and easy dirt disposal.

Reach Further

The telescopic Power Wand extends cleaning reach by 32 inches to clean shelves, corners and hard to reach areas. A crevice tool stores on board, as well as a natural bristle dusting brush that gently cleans baseboards and blinds.

Specifications

Tracker

Model Number	71000
Dust Bag	71060 (Pkg. of 12)
Dust Bag Capacity	1 Gal (3.79 L) – 4 Quarts
Filter System	HEPA Media
Suction Power	10 A
Air Volume	120 cfm
Motor Type	Single-Stage / Bypass
Water Lift	89" (226 cm)
