

Floor Sealers

The perfect start to great looking floors

About these products

Floor sealers act as a base coat to your flooring – they ensure a perfect floor finish application by filling the cracks and small pores of your existing flooring while increasing the adhesion of the floor finish to the surface. Floor sealers not only protect your existing flooring investment from future abrasions and dirt but also improve floor safety. They considerably reduce maintenance costs. They are designed as a base coat to protect floors, they boast superior levels of durability, are detergent resistant and leave a smooth surface for the application of floor finish.

- The solids fill and seal pores as they harden
- Provides a smoother floor surface
- High durability for long-lasting protection
- Detergent resistant
- Stain resistant
- Protects both resilient and non-resilient floors
