

EnviroFlex

Optimal cleaning performance!

About this product

The EnviroFlex Proportioner is easy to use and can be installed in just a few minutes. The new model has been redesigned with a sleek modern look. It now includes more accessories, including: 2 wall charts, the standard wall chart as well as the new Oxy-Q system wall chart printed on water resistant no tear paper; standard product labels as well as color coded Oxy-Q labels; the 5 Port Hose Bar for easy conversion to one product dilution; and two new tips: light grey and light purple.

AccuPro Technology

Consistently dispenses the precise amount of chemicals regardless of water pressure.

Cost Effective

Dilution control is the best form of cost-effective use of chemical concentrates. Diluting your own chemical is less costly than buying ready-to-use products.

Select Valve Technology

The system can be configured with 2 (1 GPM) + 2 (3.5 GPM) or 3 (1 GPM) + 1 (3.5 GPM), allowing for product and application flexibility to customize the system to your needs.

High and Low Flow Rates

Combination of low and high flow rates, using separate 1 GPM or 3.5 GPM.

Dimensions

Height: 13" Width: 6.25" Depth: 7"

Oxy-Q System

The 5 Port Hose Bar is included with every EnviroFlex Proportioner. It allows the unit to dilute one product at 4 dilution rates, reducing product inventory, simplifying training and streamlining the cleaning process.

Equivalents

1 CAD Gallon	= 4.55 Litres	= 1.25 US Gallons
1 US Gallon	= 3.78 Litres	= 0.8 CAD Gallons
1 Litre	= 0.22 CAD Gallons	= 0.26 US Gallons

Cost In Use

An important factor to consider when purchasing a product is the cost in use. Comparing the litre's prices is not a good indication of the final price paid. The formula to obtain the cost in use is as follows:

Unit Price / Unit Size = Price Per Litre

Price Per Litre / Sum of Parts from Dilution = Cost in Use (Per Litre)

Cost In Use Examples

Disinfection

Dilution	Price	Format
1:20	\$23.00	4 L

$\$23.00 / 4 \text{ L} = \5.75

$\$5.75 / (1+20) = \text{\$0.27 per litre}$

Cleaning

Dilution	Price	Format
1:80	\$23.00	4 L

$\$23.00 / 4 \text{ L} = \5.75

$\$5.75 / (1+80) = \text{\$0.07 per litre}$
