

Power Nozzle

Simplified Cleaning

The new DB Targa is the perfect piece of equipment to enhance and add more functionality to your vacuum. Its flexibility and 4-level height adjustment can be fitted to your cleaning needs. Its brush picks up tough-to-reach debris along baseboards, and the rubberized bumper protects your walls and furniture.

Highly Efficient

The brush roller may be switched off by pressing the green illuminated on/off button, so delicate rugs and flooring can be cleaned with a straight suction. The 180° swivel neck allows for impressive steering abilities and provides manoeuvrability around and under furniture, while the L-shaped head makes for incredible edge cleaning.

Independent Brush Motor

Driven by a non-slip belt, you can be confident that the power won't decrease as time goes on. It features an orange warning light with an automatic shut off in case the roller gets obstructed. This also prevents the belts from breaking if you accidentally pick up something, like a shoelace or a sock from under the bed. The brush roller can be easily removed for a convenient clog removal.

Specifications	DB Targa
Model Number	28393
Vacuum Type	Dry
Nozzle Width	15" (38 cm)
Working Height (with the tube)	53" (134.6 cm)
Brush Speed	2700 rpm
